# Press Release

## Find and Manage Duplicate Files Quickly, Effectively

Key Metric Software Releases Duplicate File Detective 2.0

**TRAVERSE CITY, MI** – **October 18ᵗʰ, 2007:** Key Metric Software has released version 2.0 of Duplicate File Detective – its professional-grade duplicate file management software.

Duplicate File Detective 2.0 is a major upgrade to the duplicate file management software designed specifically for information technology professionals. This new release provides integrated image previewing, byte-for-byte file matching, deep improvements to our SmartMark™ duplicate file selection assistant technology, improved support for multi-core processor computers, and much more.

Duplicate File Detective is able to search multiple local and remote (network) file system paths for duplicate files in a single pass. It uses advanced file content matching technology to seek out duplicate files, and provides built-in tools to assist in moving, deleting, or compressing them to reclaim storage space. The software also provides advanced search filtering, exporting and importing capabilities, and a highly customizable user interface.

Duplicate File Detective 2.0 supports Windows ME, 2000, XP, Vista, and Server 2003. Pricing starts at $39.95 USD for a single-user license, with site-wide licensing also available. Duplicate File Detective 2.0 can be downloaded from http://www.duplicate-file-detective.com, and offers a free 15-day (feature complete) trial period. Contact sales@duplicate-file-detective.com for more information.
